The result can be seen below, which shows the texthaving been written to the document but it looks amess. Chunks have no concept of how to force a new line when the length exceeds the available width inthe document. Really, all they should be used for isto change or set the style of a word or phrase inline. You can of course force a newline using "\n" or Environment.NewLine, or even Chunk.NEWLINE as part of the string you give a chunk.
